

NEW PRODUCT

ZUMO 550

The Garmin zūmo 550 is the first fully-featured, no-compromises GPS navigator designed to be equally at home in the car or on a Motorcycle.

Zūmo boasts a 3.5-inch (diagonal) high-bright, sunlight readable touch screen display, encased in a waterproof (IEC 529 IPX-7 standards) housing. In addition to the touch screen, Zūmo has four dedicated left-handed buttons for quick input. The Zūmo is equipped with a high-sensitivity GPS receiver, which acquires and maintains a GPS signal even in heavy foliage or "urban canyons" created by city skyscrapers. Zūmo comes complete with a speaker equipped in car mount and also Motorcycle mounts suitable for mounting to today's high performance machines.

Zūmo features a 10-thousand point tracklog, allowing users to record even the longest of trips – and the included MapSource® CD even lets you relive a memorable tour on their home computer through the 3-D Google Earth interface

Users can also access Zūmo's trip computer page for trip information like speed, heading, and a customizable fuel gauge that allows users to define their motorcycle's maximum fuel range. When Zūmo calculates that the vehicle is low on fuel, it automatically reminds the operator and suggests a route to a nearby gas station. High-sensitivity GPS receiver

Features of the Zumo 550 are:

- Display: 71mm W x 53mm H (3.5" dig.), 320 x 240 pixels; high bright sunlight-readable, UV-resistant, touch screen display
